Pariet® 10 mg*
ON DEMAND

Pariet®
rabeprazole 20 mg

WORKS AT THE MOMENT

Pariet® (rabeprazole) has an early onset of acid inhibition, within 5 minutes with more than 80% of the proton pumps are inhibited. ¹

Is indicated for the treatment of Active duodenal ulcer, active benign gastric ulcer, symptomatic erosive or ulcerative gastro-oesophageal reflux disease (GORD), Gastro-Oesophageal Reflux Disease Long-term Management (GORD Maintenance), symptomatic gastro-oesophageal reflux disease (symptomatic GORD). In combination with appropriate antibacterial therapeutic regimens for the eradication of Helicobacter pylori in patients with peptic ulcer disease or chronic gastritis, the healing and the prevention of relapse of peptic ulcers in patients with H. pylori associated ulcers.²

¹ Moore P, Robinson B, Kang J, et al. Efficacy of a single dose of rabeprazole 20 mg and maintenance 40 mg on 24-hour gastric acidity and esophageal acid exposure: a randomized study in gastro-oesophageal reflux disease patients with a history of recurrent heartburn. *Alimentary Pharmacology Ther* 2010; 34: 991-1000.
² Pariet® local prescribing information.

In acid related disorders

WORKS EVERY MOMENT

In GERD patients with nocturnal heartburn a single dose of Pariet® (rabeprazole) 20 mg was significantly more effective than pantoprazole 40 mg during the 24 hour postdose period. ¹

Full prescriptive information within the BDA is available upon request from Janssen scientific office.
